

# CLINIC TWINNING in Africa

Imagine travelling **100km** to see a Doctor about your diabetes. This is the reality for people in sub-Saharan Africa.

The Virtual Doctors have a solution.

Using an app, the Virtual Doctors connect isolated healthcare workers with volunteer doctors for expert medical advice. With access to more than 20 specialised areas of medicine, the healthcare workers can then provide excellent care to their community.

Help us raise **£1000** to twin King Edward Street Medical Practice and help save lives in Africa.

Clinic twinning funds the Virtual Doctors service in a twinned health clinic in Africa. By raising just £1000, King Edward Street Medical Practice can twin with a clinic, funding the Virtual Doctors service for 3 years.
